

WHAT IS A PERSONAL INJURY ACCIDENT? SUCH ACCIDENTS CAN COVER A WIDE RANGE, INCLUDING:

CAR ACCIDENTS

Motor vehicle accidents can cover a wide range, from rear-end accidents to head-on collisions. Many crashes caused by other drivers often result in very serious injuries, including traumatic brain injuries (TBIs), other head injuries, neck injuries and whiplash.

TRUCK ACCIDENTS

Accidents caused by commercial truck drivers often occur on highways and other busy roads. When a tractor-trailer or another type of large, commercial vehicle crashes into a smaller vehicle, injuries can often be catastrophic.

MOTORCYCLE ACCIDENTS

Motorcyclists often suffer serious injuries due to collisions caused by other drivers. Many drivers claim they didn't see the motorcyclist or that the biker was out of control. We know the truth. Drivers are almost always to blame for motorcycle accidents.

BICYCLE ACCIDENTS

Cyclists have the right to use the road. Unfortunately, some drivers don't share the road and end up causing collisions with bicyclists. Many bicycle accidents result in serious injuries that require emergency medical care, including surgery.

PEDESTRIAN ACCIDENTS

People crossing the street or walking alongside the road often get hit by reckless or negligent drivers. When this happens, victims of pedestrian accidents and their families need to take strong legal action to demand their rights.

SLIP AND FALL ACCIDENTS

Slip, trip or fall accidents often occur due to dangerous conditions on other people's property. Whether you slipped and fell in a restaurant, hotel, shopping mall or someplace else, you deserve to be compensated for your accident.
